ISBN: 978-9941-0-8065-4

Preface

This insect and diseases management booklet provides current information on application rates and safe use of chemicals registered for use on important vegetable and melon varieties grown in Georgia. Crops covered in this booklet are ordered according to Georgia alphabet: 1) Eggplant, 2) Potato, 3) Cucumber, 4) Cabbage, 5) Tomato, 6) Carrot, 7) Pepper, 8) Beet, 9) Onion & garlic, 10) Watermelon and 11) Melon.

All chemicals included in this booklet are registered and approved by the Ministry of Agriculture in Georgia. The booklet contains 3 types of Tables, 1- Insecticides used in vegetables and melons in Georgia; 2- Pesticides Safety Schemes; 3- Chemical Spray Guide for control of Diseases, insects and weeds in vegetables and Melons fields.

Table 1 summarizes all insecticides sold in Georgia, their IRAC codes and application rates. Table 2 contains pesticide safety information for each crop covered in the field guide including FRAC, IRAC and HRAC codes, pre harvest period for each chemical, entry period and allowed number of applications per season. Table 3 is a Chemical Spray Guide for control of diseases, insects and weeds infesting these crops and provides information about how these chemicals should be used at different stages of plant development. Recommendations are based on information listed in the manufacturers' labels and from information provided by the Ministry of Agriculture of Georgia. Performance of these pesticides may not always be acceptable, because of differences in environmental conditions, severity of pest pressure and methods of application. This publication is intended to be used only as a guide. Always follow instructions and safety information listed in the pesticide label.

For questions, concerns, or suggestions for improvement regarding this handbook, please contact Andro Khetereli andro@georgianels.ge

TABLE 1. Main insecticides used in vegetables and melons

Active ingredient	Trade name	IRAC code*	Crop	Insects	Application rate per ha
Acetamiprid 200 g/kg	Ace SP	4A	Cucumber, tomato	Aphids, moths	0,2 kg
			Potato	Colorado beetle	0,025–0,03 kg
	Temp WP	4A	Tomato	Aphids	0,2 kg
			Cucumber	Moths	0,25 kg
			Potato	Colorado beetle	0,06 kg
Alpha-cypermethrin 100 g/L	Alpac EC	3	Potato	Aphids, Colorado beetle	0,1 L
				Potato tuber moth	0,1–0,2 L
	Fastac EC	3	Potato	Colorado beetle	0,07–0,1 L
				Potato tuber moth	0,1–0,2 L
			Beetroot	Flies, aphids	0,1 L
Bifenthrin 100 g/L	Talstar 10 EC	3(A)	Tomato	Mites	0,4 L
			Cucumber	Aphids, mites	0,3–0,4 L
			Cabbage	Aphids, cabbage white	0,2–0,3 L
Carbosulfan 50 g/kg	Marshal 5G, GR	1A	Potato	Potato tuber moth, Colorado beetle	0,75–1 kg
Chlorpyrifos 450 g/L	Dursban EC 450	1B	Potato	Colorado beetle	1,5 L
Chlorpyrifos 500 g/L + cypermethrin 50 g/L	Nurell-D EC	1B + 3	Potato	Colorado beetle	0,5–1,0 L
Cypermethrin 250 g/L	Alexander EC	3	Potato	Aphids	0,5 L
				Colorado beetle	0,1–0,2 L
			Cabbage	Cabbage white, moths, aphids	0,16 L
			Cucumber, tomato	Whiteflies	1,2–1,6 L
			Pepper	Aphids, thrips	0,65–0,8 L
			Melon, watermelon	Moths	0,24–0,32 L
			Carrot	Carrot psyllid, carrot rust fly	0,5 L
	Arrivo 25 EC	3	Potato	Aphids	0,1–0,2 L
				Potato tuber moth	0,16 L
			Cabbage	Cabbage white, moths, aphids	0,16 L
			Melon, watermelon	Moths	0,24–0,32 L
			Carrot	Carrot psyllid, carrot rust fly	0,5 L
Deltamethrin 25 g/L	Decis Blue 25 EC	3(A)	Potato	Potato tuber moth, Colorado beetle	0,1–0,2 L
			Tomato	Moths, Colorado beetle	0,25–0,4 L
			Cabbage	Moths, cabbage white, aphids	0,3 L
			Carrot	Carrot rust fly	0,3 L
			Watermelon, melon	Moths	0,25–0,5 L
Deltamethrin 250 g/kg	Decis Prof WG 25	3(A)	Tomato	Moths, aphids	0,025–0,5 kg
			Cucumber, watermelon	Aphids	0,025–0,04 kg
			Potato	Colorado beetle	0,01–0,05 kg
Dimethoate 400 g/L	Bi 58 EC	1B	Potato	Potato tuber moth	1,4–1,9 L
			Cabbage	Mites	0,6–1,0 L
	Beetal EC	1B	Potato	Colorado beetle	1,2 L

II—Moderately toxic: Estimated to be fatal to an adult human at a dose of 5 to 30 g.	HRAC: Herbicide Resistance Action Committee, http://www.hracglobal.com

TABLE 3M. MELON: Chemical control of diseases, insects, and weeds

Application number and timing*	Diseases and insects	Pesticide type	Active ingredient	Trade name	Toxicity^	Resistance classifications~	Application rates	
							Per ha	In 100 L water
Treatments before transplanting								
1: Before sowing or after plant emergence	Downy mildew, root rots, diseases caused by oomycete soil fungi	Fungicide	Propamocarb hydrochloride 530 g/L + fosetyl aluminum 310 g/L	Previcur Energy SL 840	U	28 + 33	Watering: 3 g preparation in 2 L water per m ²	
			Propamocarb hydrochloride HCL 722 g/L	Propacur N SL	U	28	Watering: 0,15% solution	
			Mefenoxam 350 g/L	Apron XL ES	II	4	Watering seedlings: 0,04% solution	
2: 7-10 days after plant emergence	Downy mildew, root rots, diseases caused by oomycete soil fungi	Fungicide	Propamocarb hydrochloride 530 g/L + fosetyl aluminum 310 g/L	Previcur Energy SL 840	U	28 + 33	Watering: 3 g preparation in 2 L water per m ²	
			Propamocarb hydrochloride HCL 722 g/L	Propacur N SL	U	28	Watering: 0,15% solution	
			Mefenoxam 350 g/L	Apron XL ES	II	4	Watering seedlings: 0,04% solution	
3: Treatment of seedlings before transplanting	Downy mildew, anthracnose, late blight, brown mold	Fungicide	Propineb 700 g/kg	Antracol WP 70	U	M	1,5 kg	300 g
	Downy mildew		Mancozeb 800 g/kg	Dithane M-45 WP	U	M	1,5 kg	300 g
	Downy mildew, bacterial diseases		Copper sulfate + calcium chloride 200 g/kg	Cuperval	III	M	5 kg	1 kg
	Downy mildew, bacterial diseases		Bordeaux mixture as metallic copper 20%	Safa Bordeaux Mix WP	III	M	5 kg	1 kg
	Aphids (melon aphid), Colorado beetle	Insecticide	Imidacloprid 700 g/kg	Confidor Maxi 70 WG	III	4A	0,05 kg	10 g
	Moths		Deltamethrin 25 g/L	Decis Blue 25 EC	III	3(A)	0,5 L	100 mL
	Aphids		Thiamethoxam 250 g/kg	Actara WG	U	4A	0,1 kg	20 g
	Colorado beetle		Alpha-cypermethrin 100 g/L	Fastac EC	III	3	0,3 L	60 mL
Treatments after transplanting								
1: 10 days after transplanting; or, if sown, in the 2- to 3-leaf stage	Downy mildew, anthracnose, late blight, brown mold	Fungicide	Propineb 700 g/kg	Antracol SW	U	M	1,5 kg	300 g
	Downy mildew		Mancozeb 800 g/kg	Dithane M-45 WP	U	M	1,6 kg	320 g
	Downy mildew		Copper hydroxide 400 g/kg, exp. as Cu	Iroco 40 WG	U	M	1,75 kg	350 g
	Downy mildew, root rots, diseases caused by oomycete soil fungi		Propamocarb hydrochloride 530 g/L + fosetyl aluminum 310 g/L	Previcur Energy	U	28 + 33	2,5 L	500 mL
	Aphids (melon aphid), Colorado beetle	Insecticide	Imidacloprid 700 g/kg	Confidor Maxi 70 WG	III	4A	0,05 kg	10 g
	Moths		Deltamethrin 25 g/L	Decis Blue 25 EC	III	3 (A)	0,5 L	100 mL
	Aphids		Thiamethoxam 250 g/kg	Actara WG	U	4A	0,12 kg	24 g
	Colorado beetle		Alfa-cypermethrin 100 g/L	Fastac EC	III	3	0,3 L	60 mL
